

Accelerating Data Transformation using low code.

Cloudaeon understands the evolving needs of data-driven organizations and is a strong advocate of low-code tools to transform how data pipelines are designed, developed, and deployed. Our mission is to empower Databricks users to achieve the full potential of Apache Spark through the application of Prophecy's low-code graphical platform, offering the ultimate productivity solution for data teams of all sizes.

Our Expertise

Certified Professionals:
A dedicated centre of excellence comprised of certified Databricks and Prophecy experts with years of experience in data engineering and analytics.

Innovative Approach:
Committed to driving value from data initiatives by harnessing the latest technologies and methodologies to drive business outcomes.

Our Offerings

- **Data Platform Integration**
- **Data Engineering and Analytics**
- **Data Transformation**

Detailed offerings

Data Platform Integration:

- Seamless integration of Prophecy's low-code platform with Databricks, enabling users to design, build, and deploy data pipelines with minimal coding.
- Visually designed Prophecy pipelines that leverage the scalability and performance of Apache Spark on Databricks.

Data Engineering and Analytics:

- End-to-end project support, from initial concept through production, with a focus on rapid CI-CD pipelines.
- Expert guidance on optimising data operations for efficiency, leveraging our deep knowledge of both Prophecy and Databricks ecosystems.

Data Transformation:

- Collaboration methodology strategies to enhance productivity and facilitate the sharing of projects, pipelines, sub-graphs, and custom-gems that democratise data transformation.
- Training and support are needed to ensure your team can fully utilise low-code solutions for large-scale data operations.

Benefits

- **Accelerated Time to Insight:** Dramatically reduce the time from raw data to data value with streamlined workflows and optimised data pipelines.
- **Enhanced Productivity:** Intuitive interfaces and automation reduce manual effort, freeing your team to focus on strategic initiatives.
- **Scalability and Flexibility:** Solutions designed to rapidly scale and support your growing data needs and evolving business requirements.
- **Cost Efficiency:** Optimise resource utilisation and reduce operational costs through efficient data processing and management strategies.
- **Security and Compliance:** Leverage secure, compliant data handling practices inherent to Databricks and enhanced by Prophecy's integration.
